

MAQUINZA

ALQUILER Y VENTA DE MAQUINARIA

MACHINERY RENTAL

Earthmoving · Load Lifting
Aerial Lifts · Air and Power

The company was born in 1980. Over the years, Maquinza continues to be a family business and has expanded throughout much of the national territory. It currently has offices in Zaragoza, Burgo de Ebro, Tudela, Logroño, Pamplona, San Sebastián, Bilbao, Barcelona, Madrid, Guadalajara, Valencia, Toledo and Fraga-Lleida. This deployment allows us to be closer to all our clients every day and thus be able to offer them **agile and personalized solutions** for sales and rental transactions.

Based on **extensive experience**, at Maquinza we have created an unmistakable way of working, based on effectiveness, efficiency and the values of competence and professionalism. This makes us identified as a modern, solid and consolidated company focused on comprehensive solutions and that provides **services to the construction, civil works, industry and agriculture** sectors, among others.

We invest in **new machinery and technology** to keep our rental fleet up to date with innovations in the sector. Renewing our machines allows us to quickly adapt to customer needs and new regulations.

We are committed to offering a comprehensive machinery rental service that includes not only the delivery of high-quality equipment, but also **personalized technical assistance in the field**. Through continuous training of our staff we ensure quality service and work for the client.

Notes

[illegible]

Your machine documentation always available

We have developed a new digital resource to access relevant information about our machines: a QR code that gives access to all documentation online.

Documentation available

Commercial Catalog	Declaration of Conformity (CE)
Operator's Manual	Contract clauses
ITV documentation	Transport manual
Insurance	Regeneration card

How to access

The QR is located both on the rental contract and on the machine itself, next to the controls.

By scanning it you can access all the documentation for said machine.

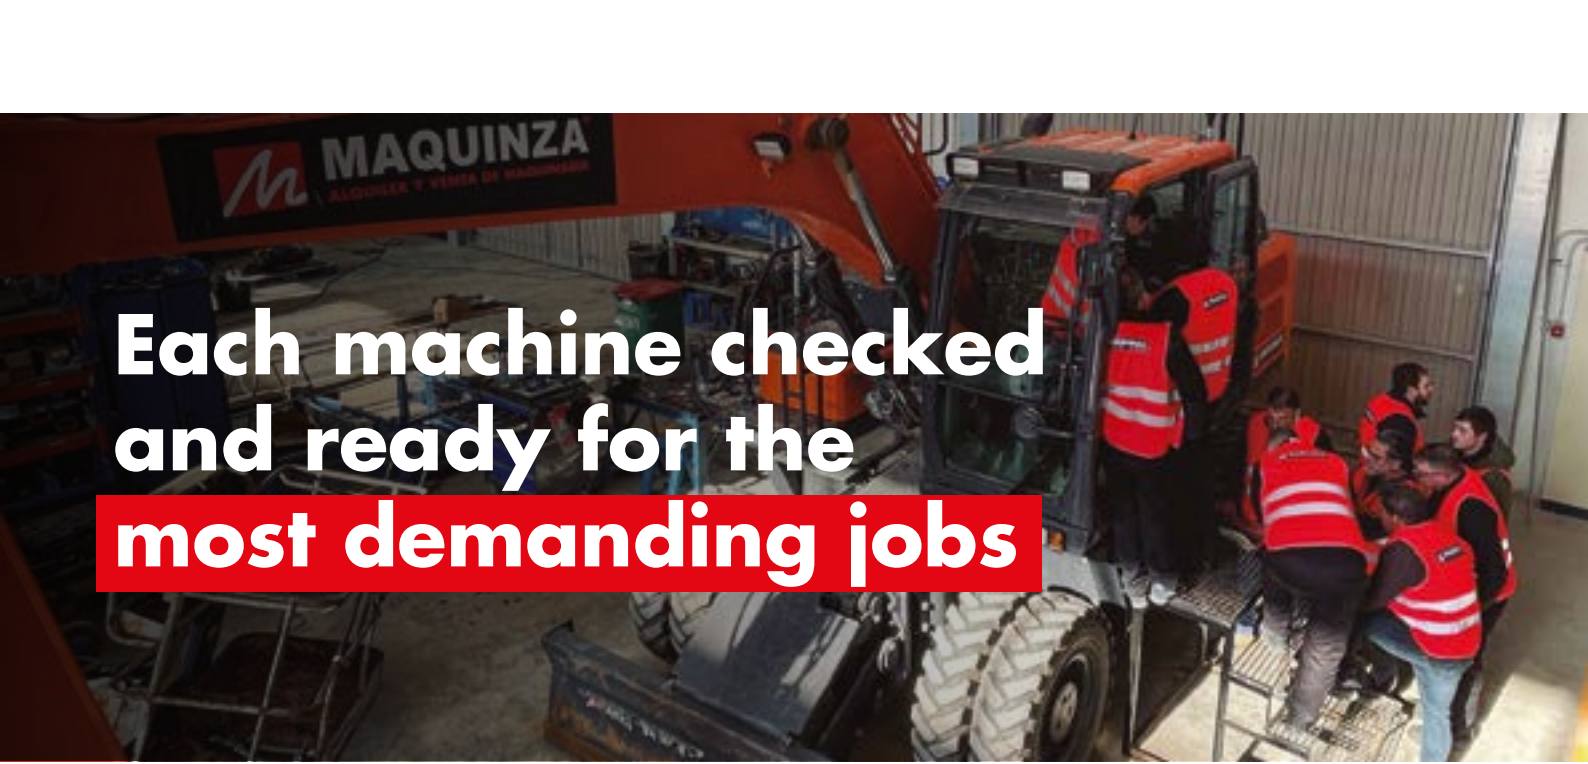

In this way, the operator can quickly and easily access the technical manual and other documents. The online platform allows you to view and download all the documentation in a simple way.

Our clients enjoy the peace of mind that all their employees and collaborators have the information they need at the moment.
